# Microsoft Power platform

One connected platform that empowers everyone to innovate

---

Build web and mobile  
apps fast and  
without limits

---

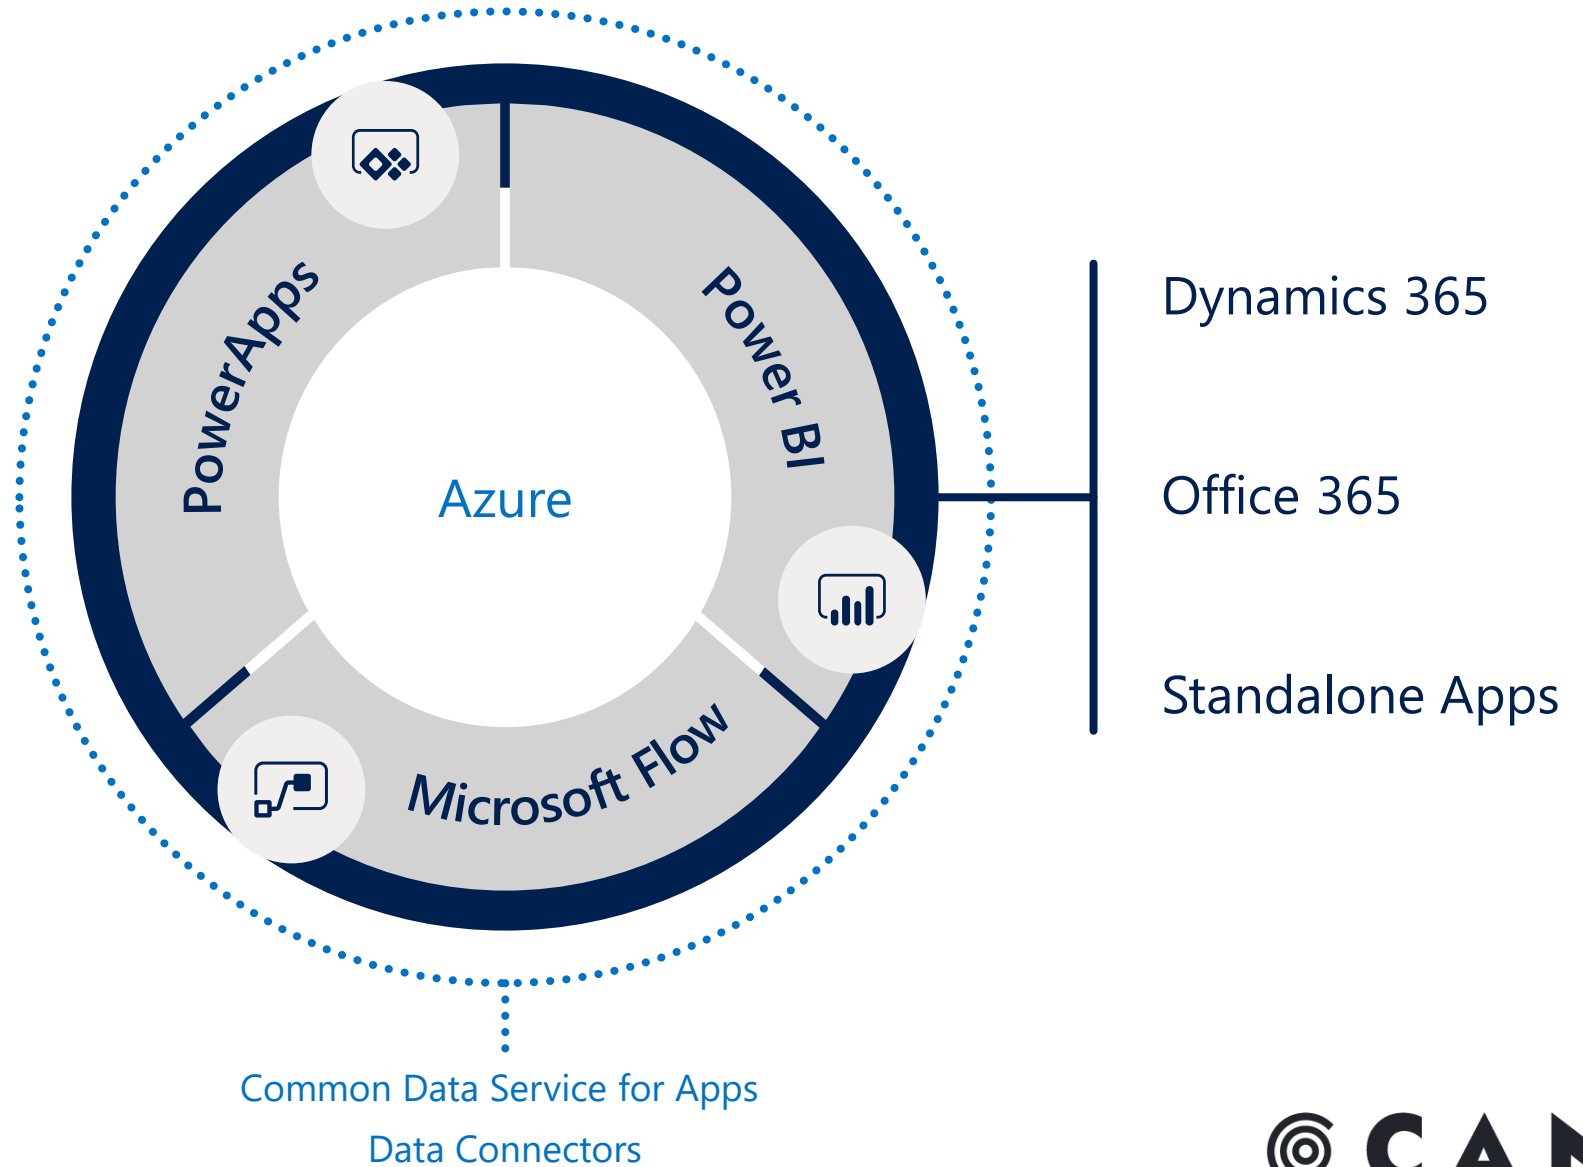

Gain insights from  
your data regardless  
of where it lives

---

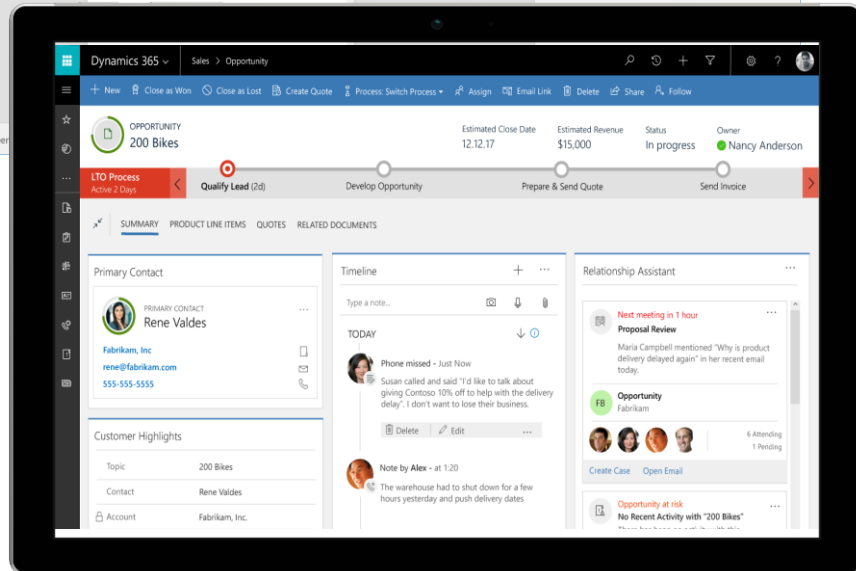

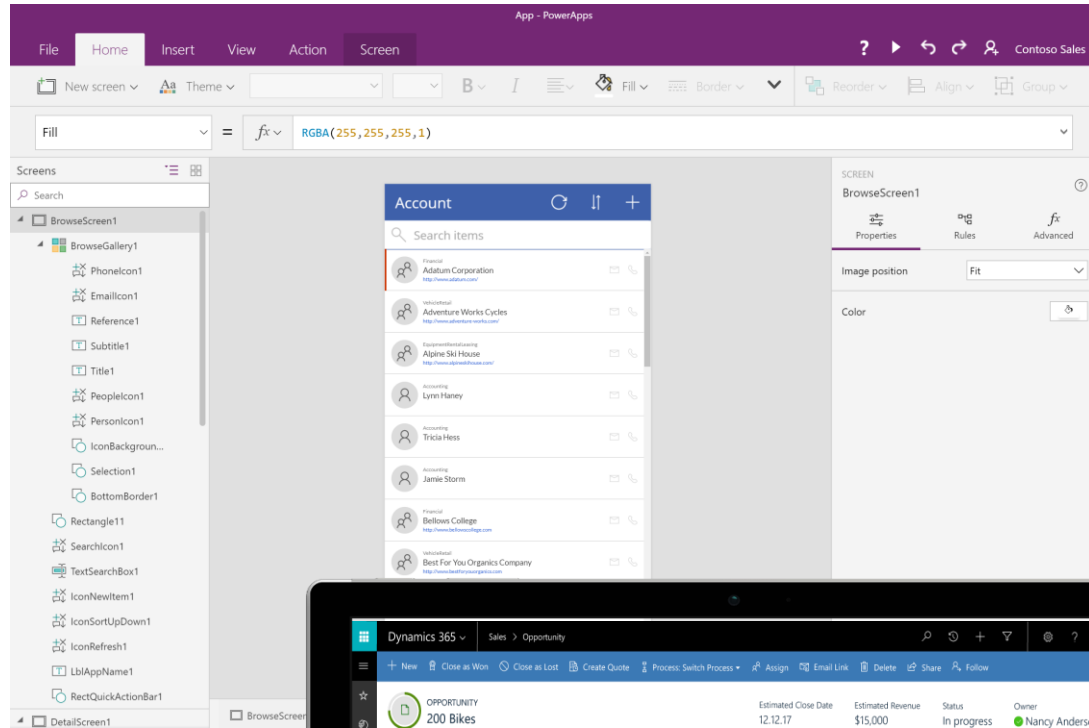

Enterprise-ready  
security and  
governance

# Microsoft Power Platform

# PowerApps

## Rich, WYSIWYG canvas-based authoring

Sophisticated apps  
built from data

- **Rich canvas-based authoring**

Full creative freedom to place controls and craft user experiences with a PowerPoint-like canvas

- Ability to create app logic with familiar Excel-like expressions and to mash up data from multiple sources right at the app level

- **“True WYSIWYG”**: use the app while building it

Creators work with live data and can directly use the app as they work, getting instant feedback

- **Template apps for phone, tablet, and web**

Pre-built apps covering common business development scenarios across devices and form factors

- **Create apps around forms and processes**

Model Driven apps allow fully metadata driven applications revolving around forms and business processes

- **Design sophisticated entity forms quickly**

Drag and drop fields and controls in a visual designer. Forms can span multiple columns, multiple steps, and collapsible sections.

- **Rich, responsive client experiences**

Responsive UI automatically reflows across devices based on the space available.

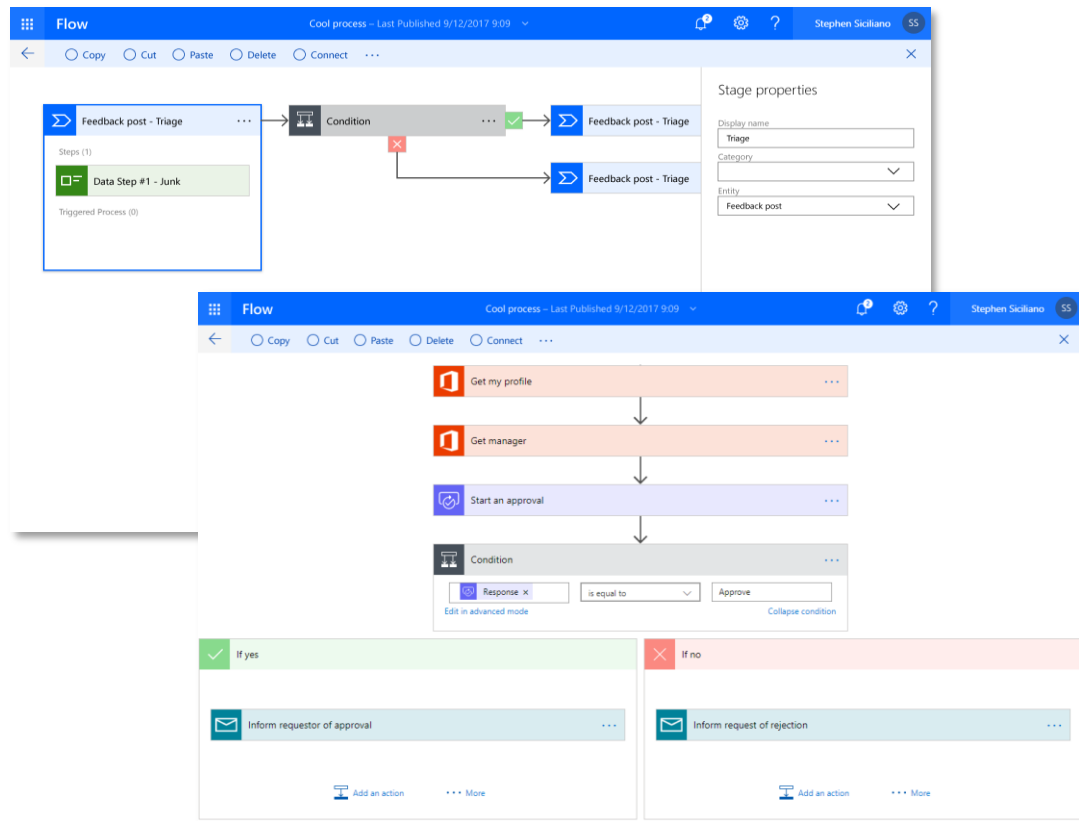

- **Immersive integrations**

Use Excel, Word, OneNote, Microsoft Social Engagement, Power BI, LinkedIn, and more directly embedded.

# Power Automate

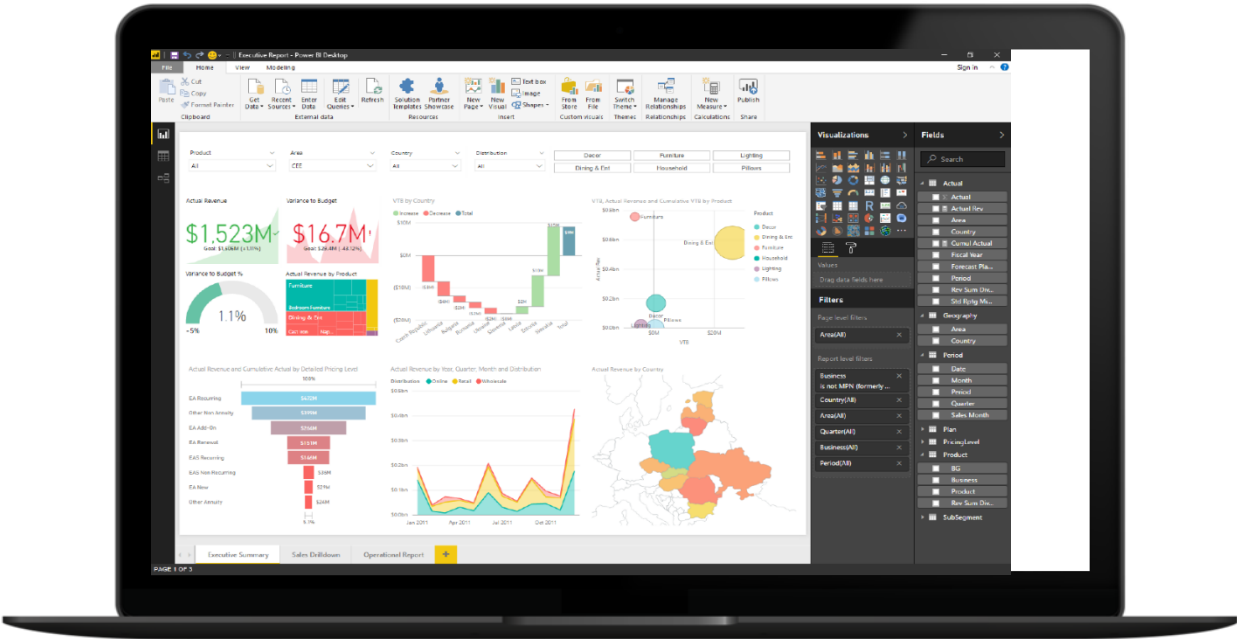

## Connecting Apps & Services

- Automate and model business processes across your apps and services
- From simple automations to advanced scenarios with branches, loops, and more
- Trigger flows from apps based on user interaction, data changes or events
- Leverage device signals on mobile devices
- Supports 230+ data sources for events and actions, from Microsoft and other vendors
- Design Flows in MS Visio
- Flow bot for Microsoft Teams
- Power Query integration

# Power BI

## Create stunning interactive reports

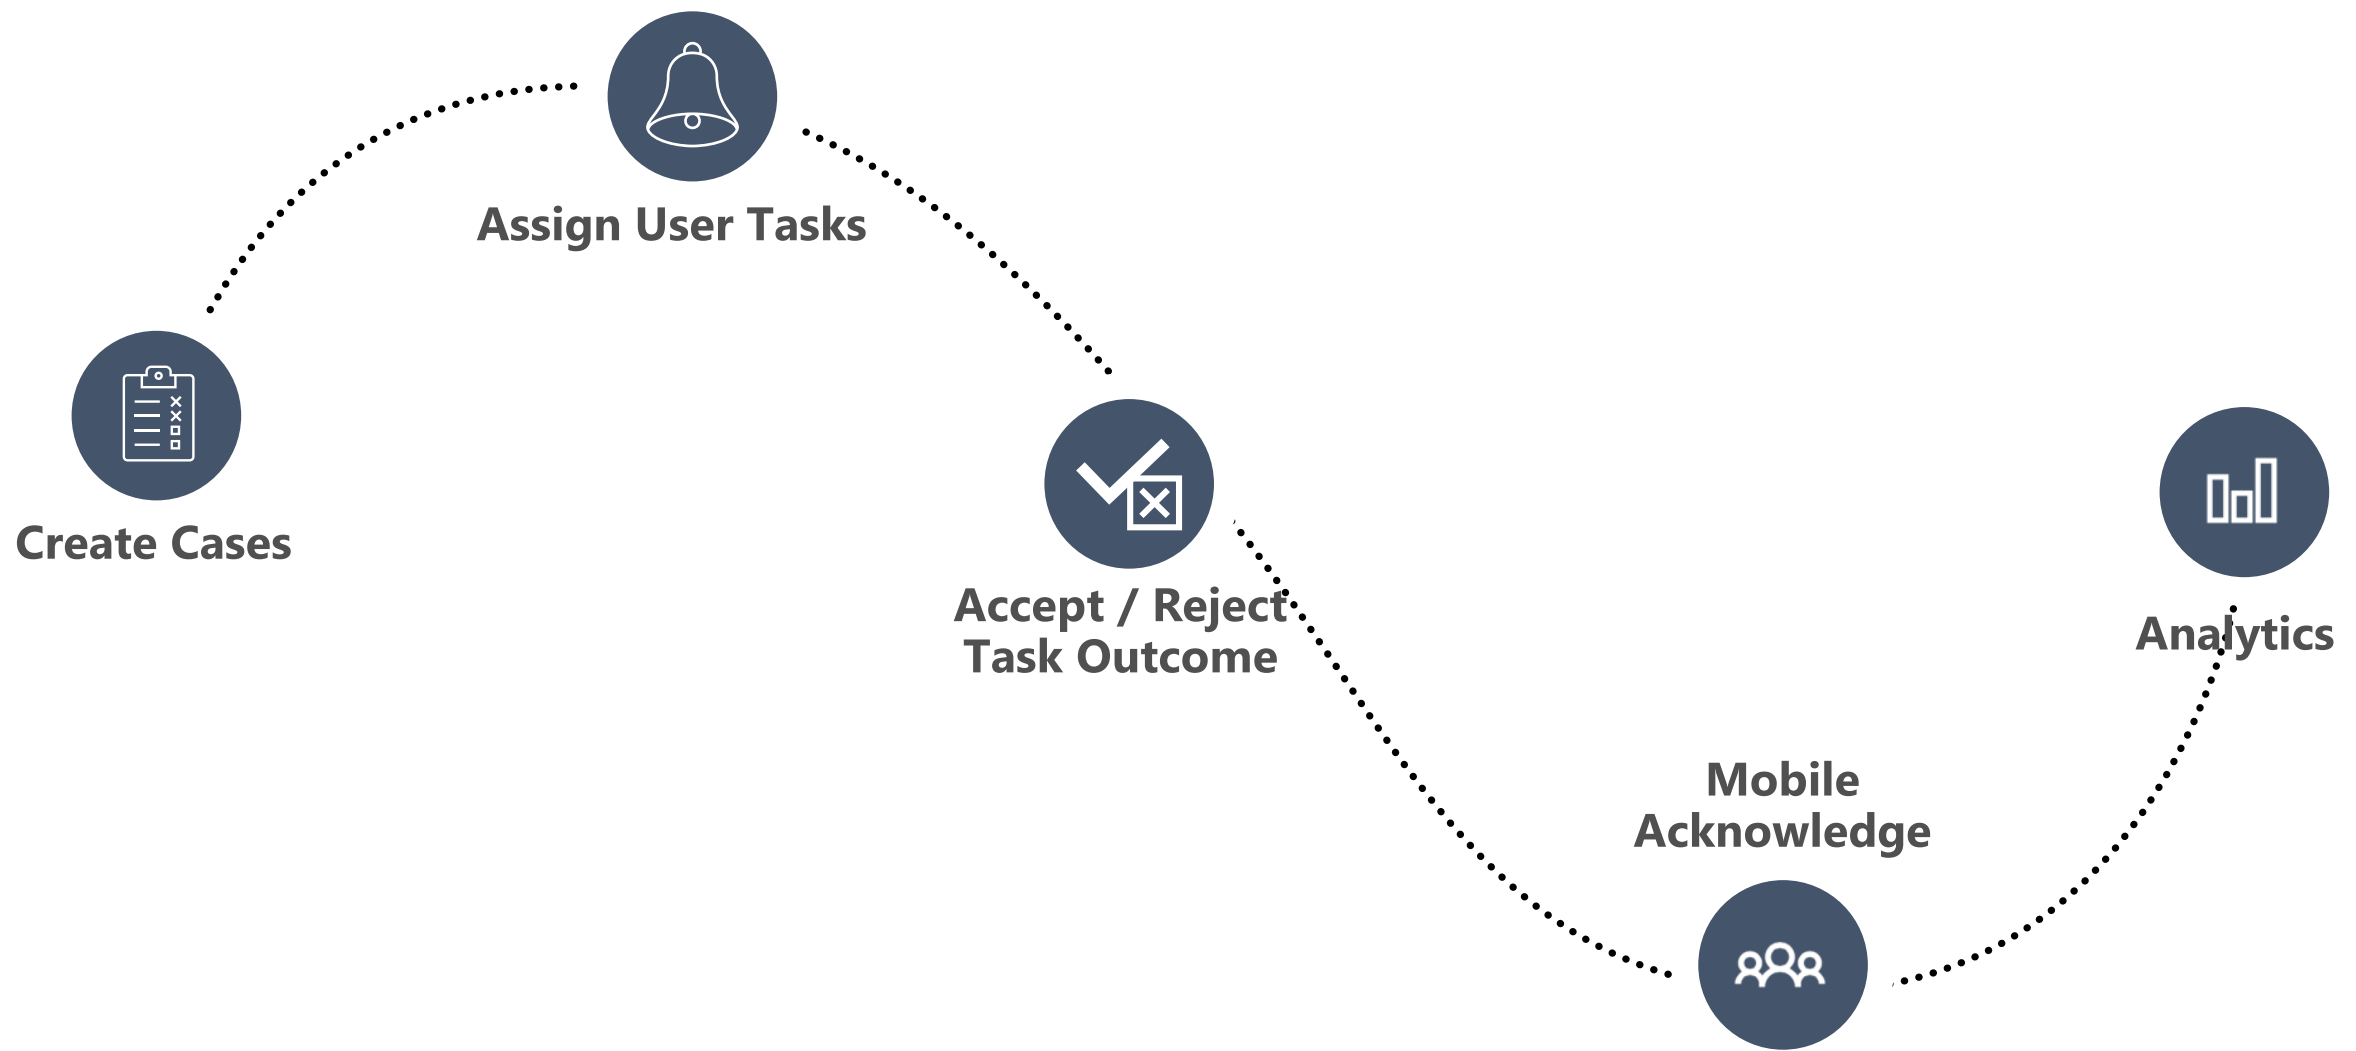

- Author reports using 150+ visuals via a drag-and-drop canvas
- Explore data across multiple interactive visualizations
- Provide insights in the context of your business with Custom Visuals
- Visualize your data story with bookmarks and custom navigation

App in ~~a Day~~  
60 minutes
